

My previous number was on the do not call list and I didn't realize how wonderful it was NOT to receive those calls at 8am.. at dinner.. at 9pm!!! I have since moved and did not place my new number on the registry... since I've moved..it's been hell! I don't even pick up the phone anymore. Even with caller ID... they somehow find a way around it! I cringe just hearing the phone anymore! Needless to say, my new number is now on the list...please don't take this protection away from us. We have the right to have a silent home. That excuse that they're just making a living is wrong! We don't come into their homes... don't come into mine!
